Sturdy and extremely efficient temporary fence

A high-quality mobile fence with excellent functionality and an affordable price

The Heras M400 temporary fencing is a robust pre-galvanised fence. It has an excellent price-quality ratio. The pre-galvanised material has no sharp zinc residues, making the temporary fencing safe for the hands and easy for 1 person to assemble. We recommend using the Heras Fence Carrier when the fencing is being set up by 1 person. With very robust quality, this fencing type is more than suitable for use in your own rental park.

- Long lifespan
- Thicker horizontal tubes
- Affordable boundaries

A stable, durable mobile fence that is quick to erect

The M400 temporary fencing is welded all around. This makes the fence also suitable for attaching banners. In addition, it is possible to add a custom sign that is visible on both sides of the fence line.

Mobile fence with a strong frame

In addition to the basic version, this type of temporary fencing is also available with extra options. For example, the fence can be made with welded corners. The stronger corner joint extends the service life considerably. This makes it the ideal choice of fencing for your rental park. A vertical centre tube provides the frame with extra rigidity and reduces torsion in the temporary fencing. A horizontal centre tube is particularly welcome if you want to transport the fences lying down and/or load/unload a truck by hand.
