Sturdy and extremely efficient

A high-quality, sturdy mobile fence at an affordable price

The Heras M400 temporary fencing with corner reinforcement is a robust pre-galvanised fence. It has an excellent price-quality ratio. The temporary fencing has welded corner pieces. This stronger corner joint extends the service life considerably. This makes it the ideal choice of fencing for your rental park. The pre-galvanised material has no sharp zinc residues, making the temporary fencing safe for the hands and easy for 1 person to assemble. We recommend using the Heras Fence Carrier when the fencing is being set up by 1 person.

- Long lifespan
- Thicker horizontal tubes
- Affordable fencing

A stable, durable mobile fence that can be erected quickly

The M400 temporary fencing is welded all around. This makes the fence also suitable for attaching banners. In addition, it is possible to add a custom sign that is visible on both sides of the fence line.

Mobile fence with a strong frame

In addition to the basic version, this type of temporary fencing is also available with extra options. For example, the temporary fencing can be equipped with a vertical centre tube, which gives the frame extra rigidity and reduces torsion in the temporary fencing. A horizontal centre tube is a welcome addition for transporting the fences lying down and/or when loading/unloading a truck by hand.
