## The perfect padding for your fencing line

### A suitable and handy site fence

The M400 Fitting element is a pre-galvanised fence that complements the M400 fence series. The adjusted width of 2.20 metres ensures that this fence adapts to your perimeter protection. This can also be the ideal solution if the transport vehicle requires narrower dimensions. These Fitting elements can be bundled and transported in our plastic transport frame. As the fence is narrower than the usual 3.50 metres, it also catches less wind. Its versatility makes this fence the perfect addition to your warehouse.

<br

- Attractive price
- Suitable for customising your site fence line

### A durable and quick to erect mobile fence

The frame of this pre-galvanised site fence has no sharp zinc residues, so there are no injuries to the hands. A single person can assemble this site fence without much effort. It is also possible to attach a customised fence sign to the site fences, which is visible on both sides of the fence line.

- Long life
- Usable virtually overall
- Functional
