The reliable classic fence with a vertical centre tube

The stable classic among mobile fences

The M90 temporary fencing from Heras with central V-tube is an indestructible addition to our range. The steel mesh is welded solidly to the frame by hand. The extra vertical centre tube is also hand-welded and ensures extra rigidity of the frame, increasing the torsional stiffness of the temporary fencing. All of our traditional temporary fencing is galvanised. The name M90 refers to 1990, the year in which this fence was introduced to the market by Heras. Since then, this temporary fencing has been the stable quality reference for fences with steel mesh. The longer lifespan ensures the higher purchase price pays for itself.

- Thicker horizontal tubes
- Hand-welded and galvanised
- Optimal lifespan

The mobile fence with a long service life

All our temporary fencing is galvanised to protect the fences against corrosion, i.e., rust. Our line of galvanised temporary fencing is made by first welding the material into temporary fencing by hand. The temporary fencing pieces are then taken to the galvanising plant to be treated with a layer of zinc after pre-treatment. The weld seam and zinc layer are thicker than that associated with pre-galvanised fences, which means the fences are protected against corrosion for a longer time. The lifespan is therefore considerably extended. It is ideal for when you want to use the fences on multiple projects or, for example, at coastal locations.

A mobile fence with a robust frame and many possibilities

In addition to this version, this temporary fencing type is also available as a basic fence and with additional options. For example, the fence can be fitted with welded corner pieces to give the frame even more stability and rigidity. We always recommend the use of a Heras coupler to connect the temporary fencing. This temporary fencing can also be supplied with a hook and eye connection for quick erection of a fence line. Do you have any other wishes? Contact our employees; they will be happy to help you.
