### Heavy duty temporary fence with rounded tops

#### A heavy duty variant of the Round Top mobile fence

The solution for ease of use and deterrence. The Heras Round Top model has rounded corners at the top. Because the top corners are curved, there is no welded seam here. This prevents the frame from breaking at the top corners. This keeps the corners intact, ensuring the mobile fencing retains its functionality. The corners at the bottom are welded all around and have extra welded corner pieces for optimal strength.

- Smooth top (no protruding points)
- Rounded points

#### A friendly-looking mobile fence

The mesh of this pre-galvanised temporary fencing has no sharp zinc residues, making this temporary fencing safe for the hands. This temporary fencing can be erected easily by one man. We recommend using the Heras Fence Carrier when the fencing is being set up by 1 person. It is possible to add a custom sign to the temporary fencing, which is visible on both sides of the fence line.
