Standard temporary fencing with rounded tops

A friendly-looking mobile fence

As the name suggests, the Heras Round Top model has a rounded top tube, meaning this temporary fencing has 2 fewer welds. This prevents the frame from breaking at the top corners. This keeps the corners intact, ensuring the temporary fencing retains its functionality. The friendly-looking Round Top temporary fencing from Heras has no protruding points. The corners at the bottom are welded all around and have extra welded corner pieces for optimal strength.

- Attractively priced
- Rounded tops
- Lightweight

A light, easy to set up mobile fence

The mesh of this pre-galvanised temporary fencing has no sharp zinc residues, making this temporary fencing safe for the hands. This light temporary fencing can be set up by a single person with very little effort. We recommend using the Heras Fence Carrier when the fencing is being set up by 1 person. A custom sign can be added to the temporary fencing so it is visible on both sides of the fence line.
