The lightweight yet strong plastic safety barrier

The safe and easy plastic safety barrier

The Gate Barrier is a lightweight plastic safety barrier made from a high density polyethylene mould making it hard-wearing and durable. The barrier is supplied in highly visible orange as standard, but can also be coloured to suit your corporate colours. The system benefits from a locked or unlocked mode configuration which prevents unauthorised dismantling. The barrier to barrier connection is quick and easy to use on uneven ground. The Heras Gate Barrier is stackable and therefore easy to store and transport.

- Incredible strength and durability
- Lightweight plastic barrier
- Highly visible barrier to guide public

Multi-purpose crowd barriers

Heras Mobile has several low fences in its range to guide people and traffic. The barriers thus serve to keep (larger groups of) people at a distance and to guide traffic. Ask our team about other options for the right crowd control barriers. Our systems are available in other colours.
