For extra stability and weight on our 2.3m fixed leg pedestrian barriers

For extra strength and stability

This Ballast Block is designed to be compatible with the fixed leg barriers. Easy installation for setting up crowd control fencing lines. Increase stability, due to concrete fillings. Each block has a total weight of 16kg. A perfect addition to your fencing line, especially during bad weather and windy conditions. The block consists of high density polyethylene. An the red colour takes care of increased visibility.

- Extra stability
- Ideal for crowd control
- Increased visibility

Easy installation & transportation

The barrier ballast blocks fit between the vertical bars of the fixed leg barriers and rest on the fixed legs, increasing the overall strength and stability of the barrier. The blocks can be stacked on top of each other, that's a big win for easy transportation and storage.
