Fast, easy and light to process Heras temporary fencing footing

Rapid, easy and light to process

This version is a light variant of the standard plastic fence block. The sophisticated design ensures stability. The low weight makes it possible to transport more footings at the same time. The temporary fencing footing is made from recycled plastic and weighs less than 24 kg, well below the legal lifting maximum in the European Union. This means it can be handled and put in place by 1 person.

- Thoughtful design
- Maximum volumes
