Footings for a very stable foundation

Quality recycling foot

The construction fence foot is made of recycled plastic and weighs 25 kg. The recycled foot is on average lighter than a concrete block, but due to the sophisticated design, this foot provides a very stable foundation.

- Easily stackable
- Quick, simple and easy to handle
- Indestructible

Durable quality

Recycled feet are made using all recyclable plastic. As this plastic is fused together to form a solid block, it remains attractive and presentable. The design ensures that the stand is perfectly stackable.
