Increase safety on and around the construction site with Heras Interblock barriers.

Increase safety on and around the construction site with Heras Interblock barriers.

When building in a high-traffic zone, as a constructor you are obliged to install proper traffic management equipment to decrease the chance of incidents occurring. Especially when passengers need to follow designated pathways highly visible and robust pedestrian guard guides are essential. The Heras Interblock brings you everything you may expect from a crowd control solution.

- Fill with water
- Easy construction
- Robust

Protect members of the public and provide a safe working environment with Heras traffic barriers.

The guarantees of the Heras traffic demarcation solutions for crowd control. Highly visibility because of the use of safety colours. All Heras traffic demarcation products are clearly visible from afar because of the vibrant red and white safety colours. Used with or without anti-climb panel. Equip your traffic barriers with an anti-climb fence or solid panel to prohibit pedestrians from climbing over it. High-levels of flexibility. Link several units together to create the most suitable traffic demarcation for your building site. Easy handling without crane lifting. After usage, you easily take the barriers with you from site to site without needing a crane to lift them. Wind resistant. As specialists, we can calculate the specific wind resistance for your building site and assist you in choosing the most suitable traffic demarcation products.
