An excellent alternative for footings in inner-city areas

The alternative to Heras mobile fence footings

The base plate has 2 upright tubes. Slide the posts of the fences over the tubes. The plate has holes for the use of expansion bolts. This means the foot plates can be attached to a paved surface (such as asphalt) for increased stability. Fast installation and a stable Heras fencing line make the Heras base plate an excellent alternative for footings in inner-city areas. These foot plates are a good solution for guiding pedestrians and cyclists, especially when used in combination with the 1-metre high temporary fencing. Compact transport and the option of cladding also contribute to this.

- Prevents tripping hazards
- Ideal on paved surfaces
- Alternative to footings
