## Indispensable link for Heras High Security temporary fence clips

### Heras High Security couplers deter unauthorised visitors

The High Security Heras fence clip ensures only authorised people can open and/or disrupt the fence line. The nut protection developed by Heras includes a high collar to prevent the Heras fence clip from being loosened using standard tools. This temporary fencing Heras fence clip can only be (dis-)assembled with this specially-developed socket key. The socket key can only be removed when purchasing HS Heras fence clips. The High Security Heras fence clip is therefore the safest solution for connecting any type of temporary fencing. The site boss retains control of the special socket key and does not have to check the entire site for open fences every day.

- Rapid security
- Functional
- Deter unauthorised visitors
