Plastic sheet for Heras temporary fences to cordon off your site

Effective hiding and screening

A plastic sheet on Heras temporary fencing is an easy way to screen (part of) the site and effectively hide "forbidden site" elements from view, such as storage locations and backstage facilities. The experience of guests, artists and local residents is important to you. By shielding backstage areas properly (storage and private areas), your event area will appear tidy. The size of the plastic sheets for temporary fencing is 3.5 metres wide and 2 metres high. The sheets have brass rings in a hemmed edge. This ensures that they can be attached to the temporary fencing using cable ties (not included).

- Representative
- Effective hiding and screening
- Available in green and blue

Screening using a stable temporary partition

If your temporary fencing has a sheet attached, it may catch extra wind. We therefore always recommend using Heras fence stabilisers or making the footings heavier. Heras can also take care of the assembly of these solutions for you. Not every Heras fencing is suitable for a sheet to be attached to it. Our employees will be happy to advise you. The sheets are supplied without the Heras logo.
