Barbed wire head for deterring unwanted visitors

Indispensable for keeping unwanted visitors out of your construction site

Slide the barbed wire head into the vertical uprights of the temporary fencing (at the top of the tube). Or fix the end to the Heras fencing using a Heras fence clip. After this, stretch 2 or 3 rows of barbed wire above the temporary fencing. This will create up to 50 cm more height for extra deterrent. Suitable for use on temporary fencing and the City-Combi fence.

- Simple
- Effective
