Indispensable Y-piece for deterring unwanted visitors from your construction site.

Indispensable Y-piece for deterring unwanted visitors from your construction site.

Slide the barbed wire head into the vertical uprights of the temporary fencing (at the top of the tube). Or fix the end to the Heras fencing using a Heras fence clip. After this, the barbed wire or concertina can be stretched out along the top of the temporary fencing. The Y-head ensures the barbed wire protrudes on both sides of the temporary fencing. This will create up to 50 cm more height for extra deterrent.
