Barbed wire for a deterrent effect.

Barbed wire as a deterrent.

For semi-permanent temporary fencing installed on posts, 2 or 3 rows of barbed wire can easily be attached above the fences. If you opt for footings, the barbed wire can be stretched along the fences using the barbed wire heads. This creates extra height and increases the deterrent effect. Simple, yet very effective. The barbed wire is supplied in rolls.

- Deter
- Create extra height
