Limits the risk of Heras mobile fences being blown or knocked over

Improved stability

The Steadfast strut stabiliser offers improved stability thanks to being fitted at an angle of 45 degrees to the temporary fencing. The strut must be fastened to the Heras temporary fencing using a Heras fence clip. The stabilisers are anchored to our special footings. This stabiliser fitting system ensures a tighter fence line and a professional appearance while making it very difficult to move. An excellent, inexpensive alternative for a semi-permanent set-up. The use of the Steadfast strut stabilisers extends the life of your temporary fencing.

- Professional appearance
- Tight temporary fencing line
