The right lock for your temporary fencing gate

Flexible and easy system

This temporary fencing lock bracket ensures the gate is properly secured outside work hours. The temporary fencing lock bracket is a flexible and easy system that is applicable for a wide range of uses. Using hinges and wheels, temporary fencing elements can be turned into a temporary gate. The temporary fencing lock bracket ensures the fence pieces remain tightly locked to each other when the gate is closed. A chain lock generates too much play between the fence pieces, which is terrible for security. The stainless steel temporary fencing lock bracket is vandal-resistant and neat.

- Safe
- Unique
- Solid locking system
