## Quickly create the most simple, yet effective mobile fence gate

### Can be used on any surface

The temporary fencing wheel can be used on any surface. This extremely strong wheel, which is made of plastic, has a diameter of 20 cm. Using a wheel and hinge, you can easily open and close a temporary fencing piece on a pivot. Applying the same system to 2 fence pieces creates a simple, 7 m-wide double swing gate, which is sufficient for freight traffic to enter and exit your construction site. We recommend using the Heras temporary fencing lock bracket as the best solution for locking the gate.

- Simple mobile fence gate
- Provide effective access
- Universal
