Lifting a Heras mobile fence has never been easier

A smart and simple design

The Heras Fence Carrier provides a better grip on the fence for installation technicians. The smart design and position from which the Heras fencing is lifted achieves improved weight distribution. This relieves strain on the back and shoulders and gives the user a better ergonomic posture. The best inventions often excel in their simplicity. This invention was developed by our own team in collaboration with students from the Fontys University of Applied Sciences and Logistics.

- Ergonomic
- Easy to use
