Space-saving storage rack for Heras pre-galvanised mobile fences

Vertical transport takes up little space

Plastic frame with 28 holes in which the vertical tube of the Heras temporary fencing fits. The temporary fencing is loose on the ground on the other side where a maximum of 28 fences can be bundled together. Heras has a lashing strap in its range for bundling. This solution is suitable for all pre-galvanised temporary fencing. Vertical transport takes up little space and extends the lifespan of temporary fencing. The stillage can be attached easily to the temporary fencing using the lashing strap or Heras fence clip while the temporary fencing is in use. The means it will not swing around and it will not require storage in another location. Heras also uses this system in its own rental park.

- Space saving
- Simple
- Effective
