Maximise your barrier storage and transport

Makes transporting of pedestrian barriers easier and safer

Pedestrian barrier stillages are designed to maximise storage and make transporting of crush barriers easier and safer. When on site the barriers are easily distributed. It is possible to transport the stillage in both length and width. Each stillage contains 25 barriers. The stillage containers can be safely stacked during storage. Besides these containers for crush barriers there are also other stillages. Even combi-containers which can carry fences, footings and couplers all-in-one.

- Maximise storage
- Easy distribution
- Longer lifetime for your products
