## Efficient gates for your temporary fencing

### Efficient gates for your temporary fencing

A temporary pedestrian gate can be used in any location. The pedestrian gate turns smoothly when a hinge is used. On one side, the tube has been shortened so that a wheel is not necessary and the gate can rotate above the block. In this way, a pedestrian gate can be fitted quickly and easily into the temporary fence line. It is immediately clear where persons can gain access to the premises.

- Access for persons
- User-friendly
